BESKRIVNING

When you have a possibility to choose the easiest and fastest method when solving an equation, your flexibility and creativity are stimulated. In this book I introduce a new formula for quadratic equations and a new method for factorising polynomials. With this method all kinds of equations with rational numbers can be solved easier and faster than with any other formula or method. But in order to solve quadratic equations containing irrational numbers, e.g. π , a formula must be used. A comparative test showed that quadratic equations were solved much faster by using this new formula compared to the so called pq-formula. In addition all these equations could be solved by mere mental arithmetic. That is unique. Some equations containing rational numbers can even be solved by mere mental arithmetic without using pen and paper.

VAD SÄGER GOOGLE OM DEN HÄR BOKEN?**9 Brain Exercises That Ensure Memory Improvement**

New simple ways to solve equations. How to solve equations by mental arithmetic, which strengthens the capacity for thinking and improves the memory ...

New simple ways to solve equations by Einar Östmyren by Einar Östmyren ...

How to solve equations by mental arithmetic, which strengthens the capacity for thinking and improves the memory, New simple ways to solve equations, Einar Östmyren ...

New simple ways to solve equations: How to solve equations by mental ...

Read New simple ways to solve equations by Einar Östmyren by ... for quadratic equations and a new method for ... be solved by mere mental arithmetic without ...

NEW SIMPLE WAYS TO SOLVE EQUATIONS : HOW TO SOLVE EQUATIONS BY MENTAL ARITHMETIC, WHICH STRENGTHENS THE CAPACITY FÖR THINKING AND IMPROVES THE MEMORY
